

SMART CITY

TALK

WHAT IS SMART CITY?

Smart City is a user-friendly approach to reporting issues noticed by the public. It allows anyone to take a photo, describe their issue to the appropriate department, and display other issues around the area.

Map

Displays pins around the users location showing different reported issues in the city.

Camera

Allows the user to take a picture of an issue in their area and submit it, along with a brief description to the city.

Requests

Allows the user to filter their request by three different categories: Public, Personal and Acknowledged.
